

Enterprise Risk Management Workshop

A one-day program designed for Senior Management Teams;
President/CEOs, CFOs, Risk Managers, Bank Directors

This workshop is designed to provide examples of a holistic, ongoing process to identify, measure, and control risk throughout the enterprise. Learn how to prioritize risk, define mitigation strategies and develop stress test alternative outcomes.

ERM...

Requires upfront and ongoing Board Involvement.

Should be managed by a committee comprised by top officers in the organization.

Focuses the enterprise on mitigating high priority risks.

Must be updated routinely as a key part of the management process.

Creates the structure for risk/reward decision making.

Is the integrated umbrella that delineates linkages among various risk currently managed in a SILO environment

Learn to...

- Enhance risk response decisions
- Identify multiple and cross enterprise risks
- Seize opportunities and exercise internal and external risks
- Reduce operational losses
- Align risk tolerance and strategy
- Enhance Risk Response Decisions

Why Attend...

- Become more knowledgeable about ERM
- Understand the underlying principles behind organization governance and the need for board level involvement in risk management
- Be able to determine which assessment techniques are suitable for the bank and define risk strategies and tolerance
- Develop effective communication and reporting protocols
- Be able to develop and implement stress testing framework in a manner commensurate with the bank's size, complexity, business activities, and overall risk profile
- Be able to determine response strategies for each category of risk facing the bank
